

Krypt Partner Program

<http://www.krypt.com/company/resellers/>

The Krypt Partner Program or KPP offers the ability for you to start, grow or expand your own hosting company to maximize revenue while focusing purely on growing your sales targets into various market segments and maintaining the high level of support and expertise your customers demand. KPP is not a cost per click / CPC program or ad based revenue sharing program - it is a program designed for serious resellers that brings value-added services based on purchase volume and reputation. Whether you're just starting out on your first web hosting venture or you're a well established company looking to expand their datacenter footprint we have solutions to meet your requirements in both Dedicated, Virtual, Colocation, and Unmetered hosting in both unmanaged and managed flavors.

KPP offers enhanced profitability and market share growth as you and your company progress to the various tiers. Krypt offers various sales and marketing resources that will help Resellers at each tier establish and grow their business. Each Reseller is also assigned dedicated account managers to help foster growth and support each Reseller's various needs and requirements. Each tier will have badges and branding material that help distinguish and recognize our partner's achievements in reaching the requirements at each tier. All tiers have access to Krypt's renowned Five Star Support provided by the VPLS Technical Assistance Center (vTAC).

Krypt Certified Bronze, Silver, Gold, and Platinum partners are scrutinized and tested day in and must adhere to the highest level of service in reselling the Krypt brand. To be considered as a Krypt Bronze Partner, just fill in the following form and a KP Program Coordinator will contact you shortly. All Krypt Partner's must have a valid and established account before receiving any discounts or be accepted into the program.

The following designated badges may be used on the reseller's site to indicate their Reseller Status Level.
